

# Create a data visualization (e.g., pie charts, bar graphs) for an inventory management system using javascript

## AIM:

The aim is to create data visualizations, such as pie charts and bar graphs, for an inventory management system using JavaScript.

## PROCEDURE:

### Step 1: Set Up Your HTML File

First, create an HTML file to hold your canvas for the chart and include Chart.js.

html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width,
initial-scale=1.0"> <title>Inventory Management Visualization</title>
<style>
  body {
    font-family: Arial, sans-serif;
    text-align: center;
    margin: 50px;
  }
  canvas {
    margin: 20px auto;
  }
```

```

</style>
</head>
<body>
  <h1>Inventory Management System</h1>
  <canvas id="pieChart" width="400"
  height="400"></canvas> <canvas id="barChart"
  width="400" height="400"></canvas> <script
  src="https://cdn.jsdelivr.net/npm/chart.js"></script> <script
  src="script.js"></script>
</body>
</html>

```

## ❑ Step 2: Create the JavaScript File for Charts

Next, create a JavaScript file (script.js) to handle the data visualization logic. javascript

```

❑ script.js
  s
  //

```

```

// Data for the inventory
const inventoryData = {
  labels: ['Electronics', 'Clothing', 'Home Appliances', 'Books', 'Toys'],
  datasets: [
    {
      label: 'Items in Stock',
      data: [200, 150, 100, 80, 50],
      backgroundColor: [

```

```
        '#FF6384',
        '#36A2EB',
        '#FFCE56',
        '#4BC0C0',
        '#9966FF'
    ],
}
]
};
```

// Creating the Pie Chart

```
const ctxPie = document.getElementById('pieChart').getContext('2d');
const pieChart = new Chart(ctxPie, {
    type: 'pie',
    data: inventoryData,
    options: {
        responsive: true,
        title: {
            display: true,
            text: 'Inventory Distribution'
        }
    }
});
```

// Creating the Bar Chart

```
const ctxBar = document.getElementById('barChart').getContext('2d');
const barChart = new Chart(ctxBar, {
    type: 'bar',
```

```
data: inventoryData,
options: {
  responsive: true,
  title: {
    display: true,
    text: 'Items in Stock by
Category' },
  scales: {
    yAxes: [{
      ticks: {
        beginAtZero: true
      }
    }]
  }
};
```

**OUTPUT:**

# Inventory Management System

Electronics Clothing Home Appliances  
Books Toys

Items in Stock
